

IRRIGATION

Bentley Manufacturing Co., Inc., is known as the technological pioneer in the die-cut industry. Our tradition of unsurpassed quality and service has made us the first choice of countless industries worldwide.

Our superior tool design and unique proprietary stamping process allow us to maintain precise tolerances on outside, inside and thickness dimensions. Our square cut and thin wall parts are manufactured without the "industry standard" concave edges. As a result, we're able to provide a superior alternative to molded and lathe-cut products.
